About This Content

A classic Orbx destination developed by Jarrad Marshall, Palm Springs has been brought to life for IPACS Aerofly FS 2!

With one of the most dramatically scenic backdrops in the United States, Palm Springs is a resort city situated 100 miles east of Los Angeles in Southern California. Explore the resort cities of Palm Springs, Rancho Mirage, Cathedral City, Indian Wells, Thousand Palms, Palm Desert and Desert Hot Springs, the high-altitude alpine wonderland of San Jacinto Peak, the windswept wastelands of the San Gorgonio Pass and the harsh beauty of the Coachella Valley desert. Famous during the 50's and 60's as the playground of Hollywood elite, Palm Springs is home to some of finest examples of mid-century Modernist architecture in the world; many examples of which can be found in this scenery. From the vast wind turbine farms, to the impressive 6000ft Aerial Tramway, from the modern skyscrapers of the Reservation Casinos to the retro chic of City Hall, there are literally dozens of interesting landmarks and features to explore. In preparation for the upcoming R22 helicopter, test your skills landing on the precarious helipads atop the Aerial Tramway, or keep your hand-flying skills up to date with low-level F-15 sorties along the western edges of Joshua Tree National Park.

As for airport itself; this field is genuinely suited for all types of flyers - from the heaviest jetliners, through corporate types and even low-and-slow GA flyers, Palm Springs is the perfect destination. Served by most US and Canadian mainline airlines to destinations across North America, the airport is famous for it's unique "outdoor terminal" - wander around the highly-detailed terminal grounds. If that is not enough, be sure to visit the Palm Springs Aviation Museum; many types operated by the US Navy are open for viewing. Optimised for performance, a huge coverage area, beautiful runway approaches for all types of aviators and extraordinary detail around the airport, Palm Springs is your perfect base of operations for Southern California. Far more than just an airport!

Key Features

- Ultra-detailed rendition of KPSP Palm Springs International Airport
- Enormous 1500sq km coverage
- Beautiful hand-edited ground textures at 30cm/1m resolution
- High-detail ground poly with bump/spec mapping
- All new custom vegetation cultivation
